Mental Health Module

October 2009 Intake (Course 22)

Title: Person Suffering From Mania

Date of Submission – 15th November 2011

Bipolar Affective Disorder is characterized by periods of deep, prolonged, and profound Depression that alternate with periods of an excessively elevated or irritable mood known as Mania.

Describe the aetiology, signs and symptoms, treatment and nursing care of a person suffering from Mania

As most patients suffering from this disorder would be on Lithium Carbonate (Priadel) describe the patient and family education for patients on this medication

Length – 1500 to 2500 words

Double line spacing is to be used throughout.

Creativity, proof of correspondence or contact and use of on-line services will be acknowledged and rewarded.

Late submissions will receive at least a lower grade mark.
